

Overview:

Manx Telecom offers...

Samsung 7030 – Up to 20 (users depending on configuration)

Samsung 7100 - Up to 60 (users depending on configuration)

Explained

The OfficeServ 7000 series has been designed to deliver advanced voice and wireless communications in a single IP platform. OfficeServ is a flexible alternative for smaller configurations, with built in Media Gateway Interface (MGI), Session Border Controller (SBC), Media Proxy Server (MPS) and VoiceMail; it provides a more efficient option with more slot capacity for other interface modules. OfficeServ is ideal for businesses with a requirement of up to 60 users, and is compatible with analogue, digital or SIP trunks. Designed specifically to fit into today's modern data centric network environments, all connections are presented as standard RJ45, reducing installation time and making it easier for a system administrator to maintain and make changes. OfficeServ has been designed with flexibility at its core; it enables businesses to configure the system to meet their requirements, and has the capability to network up to 1,000 sites.

Please see following page for more detailed product descriptions

Target Market

- Businesses ranging in size from 2 extensions and beyond (it should be noted that each Samsung 7030 can only support 10 analogue extensions, so if a customer requires over 10 extensions a second chassis will need to be bought - the 7030 can not be expanded beyond two chassis)
- Businesses which recognise the need to improve the way their employees communicate with each other, and with customers
- Businesses looking for a cost-effective system that is straightforward to configure

Features

- Scalable solutions which grow with the business
- Feature-rich business applications: i.e. voicemail, auto-attendant
- Convergence of voice and data to increase productivity while decreasing costs
- A platform that will develop and evolve with future technological improvements
- Quick and easy deployment and ongoing management
- Scalability – bandwidths can be upgraded to grow with your needs

Business Benefits

- Delivers reliable, cost effective telephone/communications solutions

Why Manx Telecom

OfficeServ 7030

The OfficeServ 7030 has been designed to deliver advanced voice and wireless communications in a single IP platform. The OfficeServ 7030 is a flexible alternative for smaller configurations. With built in Media Gateway Interface (MGI), Session Border Controller (SBC), Media Proxy Server (MPS) and VoiceMail it provides a more efficient option with more slot capacity for other interface modules. The OfficeServ 7030 services businesses with a requirement of up to 20 users, compatible with analogue, digital or SIP trunks this system can adapt to the changing communications environment. Designed specifically to fit into today's modern data centric network environments, all connections are presented as standard RJ45, reducing installation time and making it easier for a system administrator to maintain and make changes. The OfficeServ 7030 has been designed with flexibility at its core; it allows you to configure the system to meet your requirements as well as the capability to network up to 1000 sites. The OfficeServ 7000 series allows your system to grow with your business.

OfficeServ 7100

The OfficeServ 7100 has been designed to deliver advanced voice, data and wireless communications in a single IP platform. The OfficeServ 7100 is a flexible alternative for smaller 7200 configurations. With built in Media Gateway Interface (MGI), Session Border Controller (SBC), Media Proxy Server (MPS) and VoiceMail it provides a more efficient option with more slot capacity for other interface modules. The OfficeServ 7100 services businesses with a requirement of up to 60 users, compatible with analogue, digital or SIP trunks this system can adapt to the changing communications environment. Designed specifically to fit into today's modern data centric network environments, all connections are presented as standard RJ45 and the unit is 19 inch rack mountable, reducing installation time and making it easier for a system administrator to maintain and make changes. The OfficeServ 7100 has been designed with flexibility at its core; a single chassis provides 2 universal card slots which accept all available interface modules as well as the capability to network up to 1000 sites. The Samsung policy of using an open architecture in its systems enables interface modules to be common across the whole range, providing investment protection for businesses and simplification for spares holdings. The OfficeServ 7000 series allows your system to grow with your business.

DS-5007S

Featuring 7 programmable keys with LEDs, 5 fixed function keys and a clear 2 line 48 character LCD display this is the perfect solution for your general office use. The phone has 8 selectable ring tones useful in open office environments with full hands free for both on hook dialling and speech. The phone is provided with desk or wall mounting options.

SMT-i5210

The SMT-i5210 IP telephone supports the full feature set OfficeServ7000 and added UC (Unified Communication) integration in a modern stylish & ergonomic design. This includes an LCD screen, 14 programmable keys and direct access to voice mail, call logs and system directory are just a few of the items accessible at the touch of a button giving you a clear window to your communications world. Flexible design allows the handset to be positioned at 30 degree and 60 degree on your desk or if required wall mounted without requiring any further hardware or adaptors. Intelligent VPN software allows non-technical users to connect remotely over the internet without any extra hardware, with your calls secured using SRTP encryptions.
