

Overview:

At Manx Telecom, we understand the vital role that reliable telecommunications play in your business

Many businesses are increasingly putting in place comprehensive service continuity plans to ensure that key activities and resources can continue to operate in the event of an emergency. You may have your physical disaster recovery needs in place, such as desk space and equipment, but have you put in place the ability for your company's telephone and fax numbers to be rolled over to the new location?

With our Disaster Recovery solution we can give peace of mind that your communications return to "business as usual" as quickly as possible.

Explained

In an emergency or disaster situation, Manx Telecom will transfer/divert an existing number, or range of numbers, to allow the customer to continue to receive important business calls at their designated DR site, so that they can concentrate on getting their business back up and running.

Target Market

Any business with a business recovery plan, or which is looking to put one in place.

Business Benefits

- Peace of mind – quick and easy re routing of all your existing telephone and fax numbers regardless of exchange area
- Cost effective – with prices based on scale, the solution is cost effective for everyone – from small businesses to large multi site organisations
- Security – plans can only be activated or deactivated by your company's nominated person(s) with a specified password
- Ease of use – nominated personnel have the means to activate or deactivate your bespoke plan 24/7/365
- Testable – you can test your plan on an annual basis for no additional cost.

Why Manx Telecom

Manx Telecom is the Isle of Man's largest telecommunications and Internet provider, offering the full range of fixed line, mobile and data services to consumers and businesses.

Manx Telecom has developed a portfolio of services which provide businesses with the tools necessary to increase productivity, reduce costs, and win and retain customers.
