

world class hosting

Manx Telecom should quite simply be your only choice when choosing your Data Centre.

Manx Telecom was founded in 1889 and was the first company to offer Data Centre services on the Isle of Man. It now has multiple on and off-Island Data Centre facilities each providing the highest standards of data security, exemplary resilience, and expandable hosting capacity.

We provide all of our customers with Data Centre excellence, consummate security, exemplary connectivity, and a comprehensive range of managed services.

Manx Telecom's range of services and solutions serve companies of all sizes. Products include co-location hosting, fully managed hosting platforms, multi site and geographically diverse managed platforms and Disaster Recovery Solutions.

Our customers include the worlds largest Poker Operator, Online Bookmakers,

e-Money Providers, Online Payment Providers, Software Developers, e-Music Platforms, Leading High Street Financial Institutions and Large Public Sector Departments. We also provide shared managed hosting services to over 375 small to medium businesses.

Whatever your business requirements Manx Telecom can offer a range of hosting facilities and complementary solutions unparalleled in the Isle of Man and in any other offshore jurisdiction.

Isle of Man Gambling Supervision Commission approved provider of disaster recovery services to eGaming businesses worldwide.

Data Centre Excellence & Purpose Built Facilities

The only purpose built Data Centre on the Isle of Man. Manx Telecom has delivered 100% availability of Data Centre services for over 10 years and offers multi site & geographically diverse Data Centre solutions. Being able to choose and build our own facilities provides some great advantages:

- No single point of failure, guaranteed resilient diverse mechanical & electrical plant.
- N+1 Low Voltage panels (unlike many other offshore centres or any other IOM Data Centre).
- N+1 generator systems with guaranteed diesel supplies.
- N+1 battery systems and N+1 UPS systems, in separate & dedicated 1hour fire compartmented rooms.
- Guaranteed diverse ring cell protected electricity from our local authority (MEA) who also import and export Manx Electricity supplies to and from the UK grid.
- Building location specifically designed to mitigate risk.
- Significant expansion capacity at all sites – over 250 live operational racks with capacity to increase by 100%.

Guaranteed Security

- The only Isle of Man Data Centre to hold the ISO/IEC 27001 security accreditation for which we are audited twice yearly by Lloyds Register Quality Assurance (LRQA).
- The only Isle of Man Data Centre providing Fully Managed Service platforms audited to the Payment Card Industry Data Security Standard; the worlds most advanced and most stringent security standard for online payment processors. PCI DSS is widely regarded as the “gold standard” for protecting customer account data.

24/7 Operations

- Manx Telecom operates the only on site 24x7x365 technical Data Centre operations team in the Isle of Man, providing around the clock specialist engineering support.

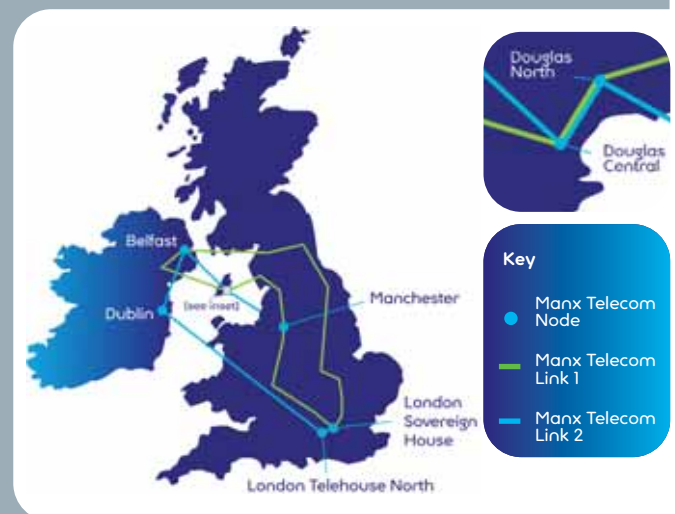

Largest Island Resources & Technical Expertise

ManxTelecom provides a confident array, diversity and scale of resource which is truly impressive.

This includes the Isle of Man’s largest Linux, Microsoft, HP, Cisco, ZXTM & VMware skill sets, enabling delivery of true 24/7 fully managed services.

Manx Telecom:

- Is one of the largest employers on the Isle of Man, over 300 people.
- Has the largest dedicated data centre solutions team on the Isle of Man.

Exemplary Connectivity

- No single point of failure, 100% availability of Internet Services for the last 3 years.
- The only Isle of Man Data Centre with high capacity quad routed fibres off island.
- Multiple carriers including guaranteed diversity through the UK and Ireland.
- Multiple diverse Tier 1 IP transit carriers and global public peering partners.
- The only Isle of Man Data Centre with an operational 10Gbps protected off-island network.
- The only Isle of Man operator providing multiple STM64 (10Gbps) international private circuits to its Data Centre customers.
- Manx Telecom also provides global MPLS solutions.
- Manx Telecom owns an extensive island wide fibre network providing wholesale private circuit and IP transit services to all other Isle of Man Data Centre Operators and IT service providers.
